GEORGE H. MACKAY, Nantucket, Mass.

The Passenger Pigeon - Only One Bird Left. - In 'The Auk' (Vol. XXVI, p. 429, 1909) I published a note entitled "The Passenger Pigeon — Only One Pair Left," it is with deep regret that the title must now read as above. On July 10, 1910, the male bird died at the age of about twenty-five years. Mr. S. A. Stephen, General Manager of the Cincinnati Zoölogical Society, writes me that the bird apparently died of old age not having shown any signs of tuberculosis, or other disease, but extreme weakness prevented his walking around. The remaining female, and probably the last living one of her race, came from the flock of the late Prof. Charles O. Whitman, and is now about fourteen years old, and in good health and plumage. The male bird was not preserved on account of the poor state of plumage.—RUTHVEN DEANE, Chicago, Ill.
